Myths and Heroic Models - 2019/2020

Disciplina Code:	722111042	**ECTS:**	10
Scientific area:			
Curricular Year:	1	**Regime:**	1st Semester
Period:	Época de Frequência	**Date of Evaluation :**	20-12-2019
Responsible Docent:	Ana Paiva Morais		
Grade:	15	**Result:**	Approved
Grade Before Spoken Test:		**Spoken Test Date:**	
Status:	Valid	**Release Date:**	17-01-2020
Current state observations:			
Improvement:	No	**ECTS Classification:**	C (**)

ECTS Classification

Classification system and possible orientations about the attribution of grades

1. the final evaluation of a curricular subject is expressed through a classification on a numeric scale of 0 to 20 values, approval being considered with a minimum of 10 values, as well as its equivalent in the erupean scale of classifications (ECTS Scale)

2. The mention of approval "AP" associated to a result of creditation in substitution of a numeric scale classification of 10-20 pertains to a dismissing of completing the curricular subject or of credits on a specific scientific area. The same was considered as fullfilled for the effect of determining the conclusion of the course but was not considered in the calculation of the final average.

3. The final classification of the course is expressed in the interval of 10-20 of the integer numeric scale of 0-20, as well as its equivalent in the european scale of comparability of classification (ECTS Scale). The final classification is calculated through the weighted average of the number of ÊCTS of each result of approval qualified for the determination of the course completion.

4. The final classification of the course can be accompanied by a qualitative statement expressed in the following scale: Suficient (10-13), Good (14 and 15), Very good (16 and 17) and Excellent (18 to 20).

5. The ECTS Scale is based on the association of a numerical definition (percentile) with the grades A, B, C, D and E, according to the following table.

ECTS Classification	Student with school achievement that obtains that classification (%)
A	10
B	25
C	30
D	25
E	10

The classification obtained on the ECTS Scale is based on the distribution of results in the range of 10-20 obtained by all students in a curricular unit or in the final classification of the course corresponding to the three academic years prior to the result, considering a minimum of 30 approved or graduated students. Whenever it's not possible to obtain the minimum number of elements in the distribution, four or five prior years are considered until the distribution reaches 30 elements. In the distribution of results, only grades obtained by evaluation are considered.

When it's not possible to obtain the minimum of elements in the distribution or the assigned grade is a creditation, the classification is assigned accordign to the table that follows, included in the letter no. 11196 od the Direcção Geral do Ensino Superior. **In this case the characters (**) are displayed nexto to their classification.**

ECTS Classification	E	D	C	B	A
Definition	Sufficient	Satisfies	Good	Very Good	Excellent
Grade (10-20 Values)	10-11	12-13	14-15	16-17	18-20
