# Intern Performance Evaluation

Olesya Kruchinina took an internship at the Russian Language Department for Foreign Students at the Ural Federal University from 10-20 March, 2020. Due to the tight schedule, she had to merge the methodological (orientational) and the practical part working both as a trainer and a trainee at which she equally succeeded.

In the course of the orientational phase, she attended classes of almost all the professors of the Department, commended as a good listener and a motivated teaching assistant with good grasp for knowledge and professional techniques.

During self-taught classes, Olesya worked responsibly and enthusiastically. An open-minded and approachable person, she found good rapport with the students, giving detailed explanations and answering on-the-spot questions about Russian vocabulary and grammar. All classes were carefully planned in compliance with the curriculum and the level of students' knowledge. Classes were held at a good pace, with the use of interactive methods.

In terms of personal assessment, the intern seeks to expand her knowledge in the field of teaching Russian as a foreign language, she is demanding and self-critical of her own teaching experience, attentive to accomplishments and shortcomings. With each subsequent lesson, significant progress in mastering professional skills was visible. During the internship, Olesya Kruchinina proved to be a responsible and creative teacher focused on professional development and achieving commendable results.
